**VILLAGE OF SHOREWOOD**

**2026 ASH REMOVAL PROGRAM**

**REQUEST FOR QUOTES**

The Village of Shorewood is seeking tree removal quotes for its 2026 Ash Removal Program. The Village has allocated funding for the removal of 30 select ash trees as part of ongoing efforts to manage the effects of Emerald Ash Borer. The project in its entirety will be awarded to a single contractor only. If the quotes obtained exceed the available budget, the Village may elect to reduce the number of trees removed.

All work must be performed between the hours of 7AM and 6PM, Monday through Friday unless prior approval is given. Contractors acting under direction of the Village shall maintain safe worksites and be responsible for proper traffic control and safety measures. Workers in the public right-of-way shall be wearing high-visibility safety vests or other suitable high-visibility clothing above the waist. No logs or other tree material shall be left overnight in the public right-of-way. Contractor is required to provide a Certificate of Liability Insurance in the amount of \$1 million with the Village named as an “additional insured”.

Contractors are asked to provide a total project price to complete work including tree removal, disposal, cleanup, stump grinding, and site restoration. Total project quotes may include an approximate cost per inch DBH for the purpose of estimating the cost to reduce project scope if needed. All work is to be completed before September 14, 2026.

THE HEART OF EVERYTHING

### **STUMP REMOVAL GUIDELINES**

1. The Contractor is responsible for contacting Digger's Hotline and working within their marked time frame.
2. The Contractor will use an approved screen or guard while the grinder is in operation.
3. All stumps shall be ground to a depth that severs the roots from the main root mass or to a minimum depth of 18 inches from the finished grade (not original grade) to allow for replanting. Any exposed roots that are above grade shall be ground to a minimum of 10 inches below grade or removed entirely. All raised areas will be ground or otherwise leveled to match the adjacent soil level.
4. Thoroughly remove excess grindings to a minimum of 12 inches below finish grade of the site. Fill in and cover all disturbed areas with clean pulverized topsoil (garden mix). Lightly compact by stepping in and then level to match the adjacent grade.
5. All disturbed areas resulting from stump grinding and removal process shall be seeded with a turf grass seed mix equal or comparable to Wisconsin DOT 40 seed mix. Seed shall be lightly raked into the top layer of soil. Remove utility locate flags when the job is complete.

**Quotes must be received by 8 AM on Monday, February 9 to guarantee consideration.**

**Please direct quote materials and questions to:**
