SECTION 1: Executive Summary

Description of District

Type of District, Size and Location

Tax Incremental District (“TID”) No. 3 (The “TID” or “ District” or “District”) is an existing rehabilitation - conservation district, created by a resolution of the Village of Shorewood (“Village”) Village Board adopted on July 14, 2008 (the “Creation Resolution”).

Amendments

The District has not had any previous amendments.

Purposes of This Amendment

Base Value Reset

The purpose of the amendment is to authorize a re-determination of the base value of the District in accordance with Wisconsin Statute Section 66.1105(5)(h). This provision of the Statute, which was adopted as 2013 Wisconsin Act 183 amended the TIF law to allow a District that has experienced a 10% or greater drop in equalized value for a period of two or more of the past consecutive years to request the Department of Revenue (DOR) to reset the base value of the District to its current value, thereby eliminating the decrement.

As set forth in Table 1 below, the original base value of TID # 3 established in 2008 was \$12,812,800. The most recent DOR certified value of TID # 3 as of 1/1/13 was \$7,748,400 which represents a decrease of (\$5,064,400) or a drop of 39.53% from the original base. In the immediately preceding year (as of 1/1/12), the DOR certified value was \$8,625,900 or a drop of 32.68% vs the original base value. The decrease in value for two consecutive years significantly exceeds the 10% minimum required for qualification for base value reset under the Statute.

Without this amendment, any new development must first generate new taxable value in an amount of at least \$5,064,400 before a single dollar of tax increment can be generated. This has served as a significant obstacle to attracting new development to the site. With this law change the Village now has two potential developments that it is considering but to maximize the TID cash flow from the development thereby mitigating risk to the Village and have an opportunity to close the district sooner, this amendment would need to be approved.

Table 1

	2012	2013
Base Value 2008	\$12,812,800	\$12,812,800
Current Value as of 1/1	\$8,625,800	\$7,748,400
Increment / (Decrement)	(\$4,187,000)	(\$5,064,400)
% Increase / (Decrease)	(32.68%)	(39.53%)

- A provision adopted as part of Act 183 requires, as a condition of being able to take advantage of the base reset described above, that the Village agree to making the impacted

TIF District subject to ONE of the three provisions outlined as follows per Sec. 66.1105(5)(i), Wis. Stats. (3, 4 & 5):

1. Expenditures will be made only within the first half of the remaining life of the District, which is 10 years and 6 months, ending July 14, 2025. Expenditures may be made after this period if approved by a unanimous vote of the joint review board., OR
2. The Village expects all project costs to be paid within 25 years of its creation date, (by July 14, 2033) which is 90 percent of the District's remaining maximum life. OR
3. At least 51% of the total value of additional public infrastructure improvements to be constructed in the District will be financed by a private developer, or other private entity, pursuant to a development agreement, in return for the Village's agreement to repay the developer or other entity for those costs solely through the payment of cash grants.

Based upon the projections contained herein, the Village selects option # 2 above and is invoking the expectation that the district will require only 90% of the remaining TID life to pay it's project costs.

Projects Within a ½ Mile of the District

In addition to the Base Value reset purpose, the Village is also seeking to amend the district to allow expenditures within ½ mile radius of the district to enable the expenditure of funds for infrastructure improvements particularly roadway improvements to serve the district.

Examples of potential projects would include:

- Wilson Drive roadway & landscape improvements.
- Trail exertions & improvements to Hubbard Park connecting TID 3 areas to the park and trail systems.

Estimated additional costs are approximately \$250,0000

Estimated Total Project Expenditures

The current Project Plan adopted in 2008 provides for estimated total project cost expenditures of \$16,055,000. To date, actual project costs have totaled approximately \$1,039,758. There have been no direct tax increments collected to date. Income consists of bond proceeds as well as exempt computer aid and charges for Service. Total income to date has equaled \$1,076,926 resulting in a net deficit in TID # 3 of \$232,831 as of 1/1/14 based upon data from the Village Finance Director.

The Village is in current negotiations with the developers for two separate projects within the district. Based upon current plans, the Village's TID participation between the two projects would total approximately \$7,700,000. This sum combined with the expenditures to date would bring total TID principal outlay to \$5,749,758 leaving \$7,315,242 of budgeted principal TID expenditure capacity available for future projects as set forth in the original project plan that could be undertaken without further plan amendments provided the costs can all be projected to be recovered by year 2032 as stipulated above.

A discussion and listing of other possible financing mechanisms, as well as a summary of total project financing for the currently pending projects, is located in Section 10 of this plan. This plan does not replace or eliminate any of the original projects as set forth in the original project plan. Those projects will be considered for implementation as the opportunities present themselves within the time line permitted under the Statutes.

Economic Development

The Village currently projects that additional land and improvements value of approximately \$44,813,851 will be created as a result of new development, redevelopment, and appreciation in the value of existing properties. This additional value will be a result of the additional improvements made and projects undertaken as detailed in this amendment. A table detailing assumptions as to the timing of new development and redevelopment, and associated values is located in Section 10 of this Plan. In addition, amendment of the District's Project Plan is expected to result in further economic benefits as detailed in the Summary of Findings hereafter.

Expected Termination of District

Pre-amendment cash flow projections indicated that the entire available life of the District would be required to retire current and projected District liabilities. Without the amendment allowing for the reset of the TID Base value, the negative impact to the TID Cash flows may result in the two pending projects not moving forward. This would represent a loss of over \$30,000,000 in tax base and would assure that the district would remain open for its 27 year life. With the amendment, the Village would anticipate being able to recover its costs for the two pending projects as well as outstanding existing liabilities by the year 2025. The Village may implement some or all of the other projects set forth in the original project plan but based upon this amendment it would do so only in the event it were able to fully recover all costs within 90% of the original permitted life of the district or by the year 2032 Based on the Economic Feasibility Study located in Section 10 of this Plan, amendment of the District would shift the projected closure year from 2027 to 2025 assuming only the outstanding costs and costs associated with the two pending projects . [Based on this study, the Village expects all project costs to be paid within 90 percent of the District's remaining maximum life.]

Summary of Findings

As required by Wisconsin Statutes Section.66.1105, and as documented in this Project Plan Amendment and the exhibits contained and referenced herein, the following findings are made:

- 1. That “but for” amendment of the District’s Project Plan, the remaining development projected to occur as detailed in this Project Plan: 1) would not occur; or 2) would not occur in the manner, at the values, or within the timeframe desired by the Village.** In making this determination, the Village has considered the following information:
 - The two projects pending, although they both have significant values, the first one to proceed would experience a reduction in the net increment in an amount over \$5,000,000. This would result in the Village having to absorb more risk and exposure for the project. If the Village is unable to absorb this risk the first project would not occur making the next project subject to the same situation and potentially causing no development to happen.
 - The Village’s original plan for development of the site was impaired when a previous developer backed out of the deal at the point of the national recession.
- 2. The economic benefits of amending the District, as measured by increased employment, business and personal income, and property value, are sufficient to compensate for the cost of the improvements.** In making this determination, the Village has considered the following information:

- As demonstrated in the Economic Feasibility Section of this Project Plan amendment, the tax increments projected to be collected are more than sufficient to pay for the remaining proposed project costs. On this basis alone, the finding is supported.
 - The additional development expected to occur is likely to generate approximately 100 temporary construction jobs over the life of the District, with an average wage of between \$20.00 and \$75.00 / hr. And 100 permanent jobs with average wages of between \$14 and \$50/ hr. (*source: Placeholders to be confirmed by developers*).
 - The additional development expected to occur within the District would create approximately 100 senior residential units and 90 assisted living residential units, providing housing opportunities area residents. This has been determined to be a significant need and priority for the Village.
3. **The benefits of the proposal outweigh the anticipated tax increments to be paid by the owners of property in the overlying taxing jurisdictions.**
 - Given that it is not likely that the District will achieve all of the objectives of its Project Plan or in the same manner without the continued use of tax incremental financing (see finding # 1), and since the District is expected to generate additional economic benefits that are more than sufficient to compensate for the additional cost of the improvements (see Finding #2), the Village reasonably concludes that the overall additional benefits of the District outweigh the anticipated tax increments to be paid by the owners of property in the overlying taxing jurisdictions. It is further concluded that since the “but for” test is satisfied, there would, in fact, be no foregone tax increments to be paid in the event the Project Plan is not amended.
 4. The boundaries of the District are not being amended. At the time of creation, and any subsequent additions of territory, not less than 50%, by area, of the real property within the District, as amended, is in need of rehabilitation - conservation work within the meaning of Wisconsin Statutes Section 66.1337(2m)(b). At the time of adoption of the Creation Resolution for this District, and any subsequent resolutions amending its boundaries, any property standing vacant for seven years immediately preceding adoption of the resolution(s) did not comprise more than 25% of the total area in the District as required by Wisconsin Statutes Section 66.1105(4)(gm)1.
 5. Based upon the findings as stated above, and the original findings as stated in the Creation Resolution and in any subsequent resolutions amending the boundaries of the District, the District remains declared a rehabilitation - conservation district based on the identification and classification of the property included within the District.
 6. The Project Costs of the District relate directly to promoting the rehabilitation of the area consistent with the purpose for which the District was created.
 7. The improvements of such area are likely to enhance significantly the value of substantially all of the other real property in the District.
 8. The amount of retail business will not change as a result of this amendment. The original project plan estimated that the district would contain 10-15% retail usage.
 9. The Project Plan for the District, as amended, is feasible, and is in conformity with the Master Plan of the Village.

SECTION 2: Type and General Description of District

The District was created under the authority provided by Wisconsin Statutes Section 66.1105 on July 14, 2008 by resolution of the Village Board. The District's valuation date, for purposes of establishing base value, was January 1, 2008.

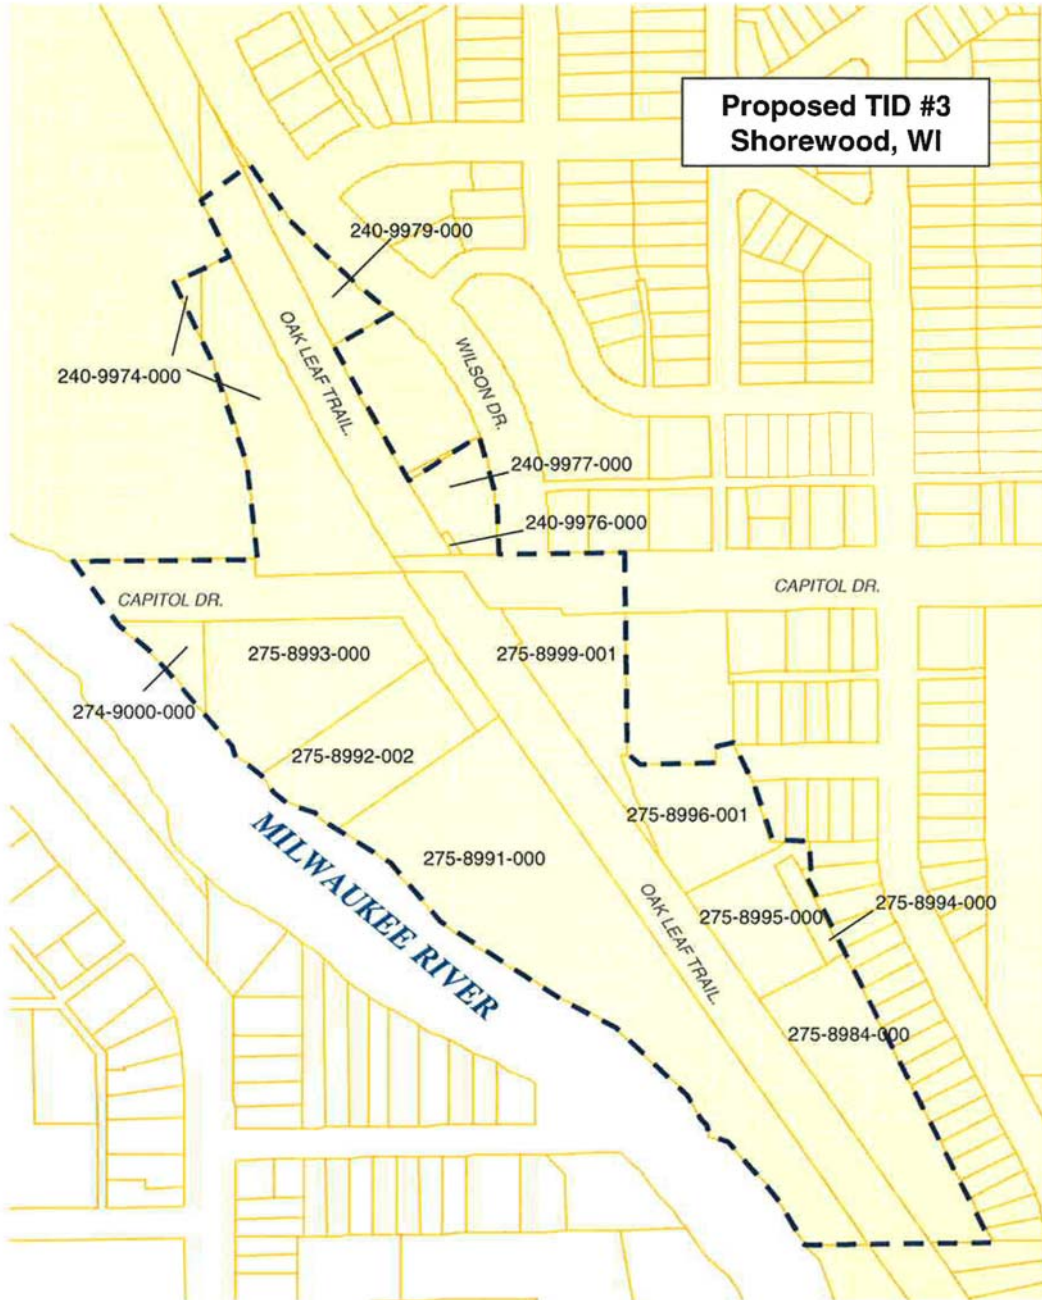

The existing District is a "Rehabilitation - conservation District" created on a finding that at least 50%, by area, of the real property within the District was in need of rehabilitation - conservation work, as defined in Wisconsin Statutes Section 66.1337(2m)(a). At the time of adoption of the Creation Resolution for this District, and any subsequent resolutions amending its boundaries, any property standing vacant for seven years immediately preceding adoption of the resolution(s) did not comprise more than 25% of the total area in the District required by Wisconsin Statutes Section 66.1105(4)(gm)1. Since this amendment does not add any territory to the District, the District remains in compliance with these provisions.

Wisconsin Statutes Section 66.1105(4)(h)2. provides authority for a Village to amend the boundaries of an existing Tax Increment District for purposes of adding and/or subtracting territory up to a total of four times during the life of the District. The boundaries of the District have not previously been amended. Since this amendment does not involve the addition or subtraction of territory from the District, it is not counted against the number of available boundary amendments.

This Project Plan Amendment supplements, and does not supersede or replace any component of the original Project Plan, unless specifically stated. All components of the original Project Plan remain in effect.

A map depicting the current boundaries of the District is found in Section 3 of this Plan. Based upon the findings stated above, the original findings stated in the Creation Resolution, and the findings contained in any subsequent resolution adding territory to the District, the District remains a rehabilitation - conservation district based on the identification and classification of the property included within the District.

SECTION 3: Map of Current District Boundary

SECTION 4: Map Showing Existing Uses and Conditions

Since the approval of the original project plan the buildings on parcels 275-983-000 and 275-8992-002 have been or will be razed and it is anticipated that the pending projects consisting of a 90 unit assisted living facility and a 100 unit senior apartment facility would be built thereon pending negotiations of agreements with developers.

Other than as mentioned in the preceding paragraph, there will be no change to District boundaries, nor any changes to the existing uses and conditions within the District beyond those identified in the original plan as a result of this amendment. A copy of this map can be found in the Original Project Plan Document.

SECTION 5: Equalized Value Test

No additional territory will be added to the District. Demonstration of compliance with the equalized value test is not required for this Amendment.

SECTION 6: Statement of Kind, Number and Location of Proposed Public Works and Other Projects

The two pending projects will receive development incentives to cover project costs. Development incentives were identified as eligible costs within the original project plan (page 16). Specific costs were not detailed but the expectation is that all costs will be undertaken within the scope of the original project budget. The location of the proposed projects receiving incentives is located on the map in the original project plan on page 18. The areas that will receive incentives are areas 1 & 4 as designated on said map.

As set forth above, the current Project Plan adopted in 2008 provides for estimated total project cost expenditures of \$16,055,000. To date, actual project costs have totaled approximately \$1,039,758. There have been no direct tax increments collected to date. Income consists of bond proceeds as well as exempt computer aid and charges for Service. Total income to date has equaled \$1,076,926 resulting in a net deficit in TID # 3 of \$232,831 as of 1/1/14 based upon data from the Village Finance Director.

The Village is in current negotiations with the developers for two separate projects within the district. Based upon current plans, the Village's TID participation between the two projects would total approximately \$4,710,000. This sum combined with the expenditures to date would bring total TID principal outlay to \$5,749,758 leaving \$10,305,242 of budgeted principal TID expenditure capacity available for future projects as set forth in the original project plan that could be undertaken without

further plan amendments provided the costs can all be projected to be recovered by year 2032 as stipulated above.

Other than the projects within a ½ mile radius, no other additional project costs are involved, and the statement of kind, number and location of proposed public works and other projects as documented in the Original Project Plan Document(s) remains in effect.

The Village reserves the right to implement only those projects that remain viable as the Plan period proceeds.

Project costs are any expenditures made, estimated to be made, or monetary obligations incurred or estimated to be incurred, by the Village and as outlined in this Plan. Project costs will be diminished by any income, special assessments or other revenues, including user fees or charges. To the extent the costs benefit the municipality outside the District, a proportionate share of the cost is not a project cost. Costs identified in this Plan are preliminary estimates made prior to design considerations and are subject to change after planning is completed. Proration of costs in the Plan are also estimates and subject to change based upon implementation, future assessment policies and user fee adjustments.

SECTION 7: Map Showing Proposed Improvements and Uses

There will be no change to District boundaries, nor any changes to the proposed improvements (other than the ½ mile radius improvements detailed on page 5) or uses within the District as a result of this amendment. A copy of this map can be found in the Original Project Plan document page 18.

SECTION 8: Detailed List of Updated Project Costs

The statement of kind, number and location of proposed public works and other projects as documented in the Original Project Plan document(s) remains in effect.

This plan details the nature and amount of development incentives to be provided to the two projects under consideration by the Village (See page 10)

SECTION 9: Economic Feasibility Study, Financing Methods, and the Time When Costs or Monetary Obligations Related are to be Incurred

The information and exhibits contained within this Section demonstrate that the proposed District is economically feasible insofar as:

- The Village has available to it the means to secure the necessary financing required to accomplish the remaining projects contained within this Plan. A listing of “Available Financing Methods” follows.
- The Village expects to complete the remaining projects in one or more phases, and can adjust the timing of implementation as needed to coincide with the pace of private development. A discussion of the phasing and projected timeline for project completion is discussed under “Plan Implementation” within this Section. A table identifying the financing method for each phase and the time at which that financing is expected to incur is included.
- The development anticipated to occur as a result of the continued implementation of this Plan will generate sufficient tax increments to pay for the cost of the projects. Within this Section are tables identifying: 1) the development expected to occur, 2) an updated projection of tax increments to be collected resulting from that development and other economic growth within the District, and 3) an updated cash flow model demonstrating that the projected tax increment collections and all other revenues available to the District will be sufficient to pay all Project Costs.
- The Village expects all project costs to be paid within 25 years of the creation date, which is 90 percent of the District's remaining maximum life or year 2033.

Plan Implementation

Projects identified will provide the necessary anticipated governmental services and/or development incentives to the district. It is anticipated these expenditures will be made during the remaining expenditure period. However, public debt and expenditures should be made at the pace private development and/or redevelopment occurs to assure increment is sufficient to cover expenses. The order in which expenditures are made should be adjusted in accordance with development and execution of developer agreements. The Village reserves the right to alter the implementation of this Plan to accomplish this objective. In any event, all additional Project Costs are to be incurred within the period specified in Wisconsin Statutes Section 66.1105(6)(am).

It is anticipated developer agreements between the Village and property owners will be in place prior to major public expenditures. These agreements can provide for development guarantees or a payment in lieu of development. To further assure contract enforcement these agreements might include levying of special assessments against benefited properties.

The order in which expenditures are made should be adjusted in accordance with development and execution of developer agreements. The Village reserves the right to alter the implementation of this Plan to accomplish this objective.

Interest rates projected are based on current market conditions. Municipal interest rates are subject to constantly changing market conditions. In addition, other factors such as the loss of tax-exempt status of municipal bonds or broadening the purpose of future tax-exempt bonds would affect market conditions. Actual interest expense will be determined once the methods of financing have been approved and securities or other obligations are issued.

If financing as outlined in this Plan proves unworkable, the Village reserves the right to use alternate financing solutions for the projects as they are implemented.

Notes:																					Projected TID Closure						

SECTION 10: Annexed Property

No territory will be added or subtracted from the District as a result of this amendment.

SECTION 11: Proposed Zoning Ordinance Changes

The Village does not anticipate the need to change any of its zoning ordinances in conjunction with the implementation of this Project Plan amendment.

SECTION 12: Proposed Changes in Master Plan, Map, Building Codes and Village of Shorewood Ordinances

It is expected that this Plan will be complementary to the Village's Master Plan. There are no proposed changes to the Master Plan, map, building codes or other Village ordinances for the implementation of this Plan.

SECTION 13: Relocation

It is not anticipated there will be a need to relocate persons or businesses in conjunction with this Plan. In the event relocation or the acquisition of property by eminent domain becomes necessary at some time during the implementation period, the Village will follow applicable Wisconsin Statutes chapter 32.

SECTION 14: Orderly Development and/or Redevelopment of the Village of Shorewood

This Project Plan Amendment will have no impact on the viability of the original District Project Plan as it relates to the orderly development and/or redevelopment of the Village.

SECTION 15: List of Estimated Non-Project Costs

Non-Project Costs are public works projects that only partly benefit the District or are not eligible to be paid with tax increments, or costs not eligible to be paid with tax incremental finance funds.

Examples would include:

A public improvement made within the District that also benefits property outside the District. That portion of the total Project Costs allocable to properties outside of the District would be a non-project cost.

A public improvement made outside the District that only partially benefits property within the District. That portion of the total Project Costs allocable to properties outside of the District would be a non-project cost.

Projects undertaken within the District as part of the implementation of this Project Plan, the costs of which are paid fully or in part by impact fees, grants, special assessments, or revenues other than tax increments.

The Village does not expect to incur any non-project costs in the implementation of this Project Plan.

SECTION 16:
Opinion of Attorney for the Village of Shorewood Advising
Whether the Plan is Complete and Complies with
Wisconsin Statutes 66.1105

RE: Village of Shorewood, Wisconsin Tax Incremental District No. 3 Amendment

Dear Village President:

As Village Attorney for the Village of Shorewood, I have reviewed the Project Plan and, in my opinion, have determined that it is complete and complies with Wisconsin Statutes Section 66.1105(4)(f).

Sincerely,

Attorney Raymond Pollen
Village of Shorewood
